ABOUT US

One accountable technology partner

12+	400+	99.9%	24/7
Enterprise Products	Specialists in Network	Uptime SLA	Cloud Infrastructure

Fratelanza is a premium technology company specializing in enterprise ERP systems, AI-powered automation, and cloud-native digital transformation. We design, build, and operate vertically integrated software platforms for healthcare, retail, real estate, and government sectors across the Middle East and Africa.

OUR STORY

Founded in 2026, Fratelanza was built to bridge enterprise-grade technology and real-world business execution. Born from deep experience in pharmacy operations, healthcare, digital transformation, and managed project delivery, we unite powerful software with a network of 400+ vetted professionals — so clients get one accountable partner, not just another vendor.

OUR PHILOSOPHY

We believe technology is not a one-time purchase — it is a long-term strategic investment. Fratelanza builds living platforms that grow with your business, adapt to regulatory changes, and integrate seamlessly across your entire operation.

Vision

To become the most trusted enterprise technology partner in emerging markets — empowering organizations with intelligent, scalable, and continuously evolving digital platforms.

Mission

To deliver world-class ERP, AI, and cloud solutions that transform how businesses operate — combining deep industry expertise with relentless innovation and enterprise-grade reliability.

OUR VALUES

Built on principles that last

Six commitments that shape every platform and every engagement.

Enterprise Security

Bank-grade encryption, role-based access, audit trails, and daily backups protect your most critical business data.

Continuous Innovation

Regular platform updates, new features, and AI capabilities keep your systems ahead of industry demands.

Client Partnership

We work alongside your team — from discovery to deployment and beyond — as a true technology partner.

Scalable Architecture

Cloud-native infrastructure designed to grow from a single branch to enterprise-wide multi-location operations.

Local Expertise

Deep understanding of regional regulations, tax compliance, and business practices across MENA markets.

AI-Ready Platform

Built from the ground up to leverage artificial intelligence for automation, insights, and decision support.

400+ Professional Freelancers

Beyond our core leadership and engineering teams, Fratelanza operates a managed network of 400+ specialists across development, design, data science, content, marketing, and industry consulting — all coordinated under one delivery framework so you never manage freelancers yourself.

SERVICES

From idea to managed go-live

Twelve capabilities delivered under one framework and one point of accountability.

Software Development
Custom enterprise software tailored to your business workflows.

ERP Solutions
End-to-end ERP implementation, migration, and support.

AI Solutions
Intelligent automation and AI-powered business insights.

Automation
Streamline operations with smart workflow automation.

Cloud Solutions
Secure cloud infrastructure, hosting, and migration.

Mobile Apps
Native and cross-platform mobile applications.

Web Apps
Modern, scalable web applications and portals.

DevOps
CI/CD pipelines, monitoring, and deployment automation.

Hosting
Dedicated VPS hosting with daily backups and SLA.

Consulting
Technology strategy and digital transformation consulting.

Technical Support
Responsive enterprise support with SLA guarantees.

Training & Workshops
Professional training programs for your team on ERP, AI, cloud systems, and digital tools — onsite or remote.

PRODUCTS

An integrated product ecosystem

Production-ready platforms with Arabic & English interfaces, built for the Middle East and Africa.

Fratelanza ERP
The central nervous system of your enterprise — unified finance, multi-branch inventory, analytics, and reporting in one intelligent platform.

Real Estate
Fratelanza Real Estate CRM — projects, units board, reservations, bilingual contracts, collections, finance, and post-handover property management.

AI Assistant
Intelligent AI assistant integrated across all Fratelanza products for automation, insights, and natural language interaction.

CRM
Fratelanza Hub CRM — unified sales, finance, tasks, calendar, customer support, and knowledge base for your entire team.

Console
Central administration console for managing all Fratelanza products, users, permissions, and system configuration.

Laboratory Management
LabMaster — end-to-end laboratory ERP from patient registration and test catalog to results, billing, accounting, and CRM.

Pharmacy ERP
Complete pharmacy ERP — POS, inventory, insurance, clinic prescriptions, ETA e-receipt, expiry control, and multi-branch chain management.

Clinic Management
Clinic Management with prescription portal links, appointment scheduling, EMR, billing, and seamless pharmacy & lab integration.

HR
Human resources platform covering recruitment, payroll, attendance, and performance management.

Marketing Platform
Multi-channel marketing automation with campaign management, analytics, and customer segmentation.

POS
High-performance point of sale with barcode scanning, multi-payment support, and real-time inventory sync.

- WhatsApp AI
- Customer Service AI
- Data Analysis
- AI Integrations

HOW WE WORK

A clear, managed delivery process

Nine stages from discovery to continuous improvement.

01 Discovery
Deep dive into your business needs, workflows, and technical requirements.

02 Proposal
Detailed solution proposal with scope, timeline, and investment breakdown.

03 Contract
Formal agreement with clear deliverables, milestones, and SLA terms.

04 First Payment
Project kickoff upon initial payment with dedicated project manager assigned.

05 Prototype
Interactive prototype for validation before full development begins.

06 Development
Agile development with regular demos, feedback loops, and transparent progress.

07 QA
Comprehensive testing — functional, performance, security, and user acceptance.

08 Delivery
Production deployment, data migration, team training, and go-live support.

09 Support
Ongoing maintenance, updates, and dedicated support for long-term success.

We Are Not a Freelancer Broker

Fratelanza relieves you from everything when working with freelancers — selection, management, quality control, contracts, payments, and delivery.

WHY FRATELANZA

The difference is accountability

Enterprise reliability with the flexibility of a specialist network.

Continuous Updates
Regular feature releases, security patches, and performance improvements keep your platform ahead.

Cloud Infrastructure
Enterprise-grade cloud hosting with 99.9% uptime SLA and global delivery.

Own VPS Servers
Dedicated servers you control — not shared hosting on unknown infrastructure.

Daily Backups
Automated daily backups with point-in-time recovery for complete peace of mind.

AI Ready
Built-in AI across all products — assistants, automation, and intelligent insights.

Multi-System Integration
Seamless data flow between all Fratelanza products and third-party systems.

Future Expansion
New modules, products, and capabilities added continuously as your needs grow.

Enterprise Architecture
Modular, API-first architecture designed for complex multi-branch operations.
